Paul Bruski  
In Your Ear Studios  
Richmond, VA

Dear Paul Bruski,

I am writing to express my interest in joining In Your Ear Studios as an audio engineer. I am a Shenandoah University graduate in Music Production & Recording Technology, currently engineering at Bias Studios in Springfield. Tom Preston and I went through the program together at Shenandoah, and he encouraged me to reach out about engineering opportunities at In Your Ear. I wanted to introduce myself directly in case you are looking to bring on an engineer now or in the near future.

What draws me to In Your Ear is its long-standing reputation and range of work from music to VO/post-production. The combination of high standards and versatility is exactly the environment I want to build my career in. It is also a natural fit for how I already work: my core strength is recording and mixing music, but I am equally comfortable stepping into podcast and VO/post-production sessions.

Over the past two years at Bias Studios I have tracked and mixed across genres on vintage API consoles, handled voice-over and podcast work for clients including DC Comics and Wondery, and maintained and repaired equipment and facility systems. I am a daily Pro Tools user and comfortable on large-format SSL consoles, and I run my own 7.1.4 Dolby Atmos mixing studio, which keeps me current on immersive workflows. Above all, I know that running a good session is as much about reading people as it is about running Pro Tools and getting a great sound. That's the part clients remember, and it's why the artists I work with at Bias tend to book me again.

I'm ready to contribute and committed to relocating to Richmond to join the team. I would welcome the chance to visit, meet everyone, and learn more about your needs. My resume is attached, and I am happy to provide references or examples of my work. Thank you for your time and consideration.

Sincerely,  
Wayne Romero
